Education

London South Bank University

BSc in Computer Science (Hons) – Predicted First Class Honours

Expected graduation date: June 2026

Newham College

Software Engineering with Electronics – Distinction, Distinction, Merit

June 2020

Experience

Software Development Intern, Offdays

May 2026 – Present

- Mentored by a senior engineer while designing automation pipeline ideas to reduce manual publishing work for country-specific content.
- Supported early-stage planning for AI-assisted content workflows, focusing on scalability, maintainability, and reducing repetitive editorial tasks.

Technical Support, Care Solution Bureau

July 2021 – July 2023

- Resolved 20+ client technical issues daily across software, hardware, network connectivity, and system configuration.
- Built strong troubleshooting, communication, and customer-facing problem-solving skills through end-user technical support.

Projects

Travelinn

React, JavaScript, Supabase, Gemini API, Vercel

- Worked with a team to integrate the Supabase backend, database, and React frontend for the first production version of a travel platform built for a client.
- Prototyped AI-assisted travel features, supported deployment setup, and collaborated on tickets during agile sprints.
- Built and refined user-facing features for hotel discovery, travel planning, community groups, and platform navigation.

LLVM Optimisations for Energy-Efficient Code

LLVM, Clang, Python, Raspberry Pi 5

- Built a repeatable experimental framework to measure how compiler optimisation levels affected runtime, power draw, and estimated energy consumption on Raspberry Pi 5 hardware.
- Automated benchmark execution and CSV-based analysis using Python to compare optimisation settings and analyse their effect on energy efficiency.

OrderFlow

Go, PostgreSQL, Docker, Firebase Auth, Stripe

- Designed a multi-tenant backend API for managing business users, products, orders, memberships, and Stripe payment link workflows.
- Implemented tenant-aware request handling for identity, membership, role permissions, and allowed operations before accessing business data.

Skills

Languages:	Python, Go, JavaScript, SQL, C, C#
Frontend:	React, HTML, CSS
Backend & APIs:	Go, PostgreSQL, Supabase, Firebase Auth, REST APIs
Tools:	Git, Docker, Linux, Bash, Make, GCC, Clang/LLVM
Data/Analysis:	NumPy, Pandas, CSV analysis
Cloud/Certifications:	Azure Fundamentals AZ-900

Leadership and Volunteering

Welfare Committee, London SouthHack

November 2024 – Present

- Supported hackathon and tech meetup delivery through event logistics, Discord community management, and participant support.

Youth Worker, Community Youth Work

July 2025 – Present

- Supported young people through community-based youth work, helping create a safe, positive, and engaging environment.
